Spotlight on: Evidence-based Resources

The **University of Manitoba Libraries** provides access to many quality information resources to support evidence-based decision-making and practice. Each resource has different formats, uses and strengths, including the ability to be used at point-of-care. Please contact the librarian with any questions about the tools and access.

ACP PIER (Physicians' Information and Education Resource) is a web-based decision-support tool designed for rapid point-of-care delivery of up-to-date, evidence-based guidance for clinicians.

BMJ Clinical Evidence systematic reviews summarize the current state of knowledge and uncertainty about the prevention and treatment of clinical conditions, based on thorough searches and appraisal of the literature.

Cochrane Library is an electronic library covering the field of Evidence-Based Medicine. It includes systematic reviews of the effects of health care, as well as articles assessing evidence related to prevention strategies and treatment.

Evidence Matters answers questions on the effectiveness, safety, and costs of therapy options for a particular patient, in an evidence-based manner.

First Consult is an evidence-based, continuously updated resource for health care students & professionals. It provides quick access, in a concise format, to the latest in evaluation, diagnosis, management, outcomes, and prevention.

He is wise who knows the sources of knowledge -- where it is written and where it is to be found.
- A.A. Hodge
